

## **Zinc One Announces New U.S. Stock Symbol and Mergent Manual Publication**

Vancouver, B.C., April 4, 2017. Zinc One Resources Inc. (TSX-V: Z; OTC: ZZZOF; FSE: RH33) (“Zinc One” or the “Company”) announces that Zinc One’s common shares have commenced quotation on the US OTC Marketplace under its new symbol “ZZZOF”.

The OTC quotation is part of the Company’s investor outreach and awareness program in North America and Europe. It is intended to provide easy access to trading of the Company’s shares to residents of the United States and is the third global trading venue of Zinc One’s shares that also includes the Toronto Venture Exchange and the Frankfurt Stock Exchange. The Company will continue to expand its marketing and investor relations activities to the United States to improve visibility and maximize domestic and international investor exposure. These multiple listings / quotations not only give Zinc One a much larger potential shareholder base but allows for enhanced liquidity.

Zinc One is also pleased to announce that it has been approved by Mergent’s Editorial Board and is now “Blue-Skyed” with a new listing in Mergent Manuals and News Reports(TM). Zinc One’s corporate profile, which includes descriptive text, data, news and financial statements, will be accessible through Mergent’s online and print products. The Mergent Industrial Manual and News Reports(TM) is a recognized securities manual in 39 states for purposes of Blue Sky Manual Exemption.

The Mergent listing should facilitate the trading of Zinc One’s securities in secondary markets in the United States while delivering maximum corporate visibility to the global securities and investment community. However, it is recommended that brokers confirm with their compliance/legal department concerning "Blue Sky" laws in specific states and other regulatory laws that might affect them.

### **About Bongará Zinc Mine and Charlotte Bongará Zinc Project**

The Bongará Zinc Mine zinc-oxide mineralization was discovered in 1974 and since then various companies have completed exploration programs across the area. The mineralization is concentrated along and proximal to a NW-trending anticlinal axis over approximately 2.5 kilometres. From the southeast edge of the project, the Mina Grande, Mina Chica and Bongarita mine areas were subject to sampling from pits and trenches as well as shallow drilling over a distance of approximately 1.2 kilometres. This zinc-oxide mineralization appears to continue to the northwest into an additional exploration area known as Campo Cielo, where additional high grade, zinc-oxide mineralization in historical pits and trenches.

The adjacent Charlotte Bongará Zinc Project was explored by Solitario Resources in 1994. Cominco Ltd. later completed five drill holes for 592 metres within the property, two of which encountered near-surface, high grade zinc oxide mineralization. Between 2007 and 2011, Rio Cristal Zinc optioned the project and eventually drilled 95 drill holes for a total of 7,722 metres on the Cristal and Charlita prospects. Rio Cristal drill results included 29.5% Zn across 15.5 metres, 26.1% Zinc across 12.5 metres, 29.7% Zinc across 11.5 metres (the cited intervals are drill-intercept widths and true widths are unknown).

## **About Zinc One Resources Inc.**

Zinc One is a Vancouver based company focused on the acquisition, exploration and development of prospective and advanced zinc projects. Zinc One believes in the current and future fundamentals of the zinc supply and demand scenario and the continued growing demand for zinc in global industrial uses.
